ABOUT US

BRIDGING DESIGN INTENT WITH ON-SITE EXECUTION

At FORMX Consultants, we develop precise, coordinated, and construction-ready design packages that bridge design intent with on-site execution — across industrial, commercial, and institutional developments.

OUR IDEAL BRIDGING INTENT EXECUTION

FORMX delivers
Structure, Civil, Mechanical, Electrical, and

Our Vision

To support industrial growth through efficient, sustainable, and well-planned design and engineering solutions. We aim to deliver practical outcomes that strengthen industries, improve operational efficiency, and contribute to long-term development.

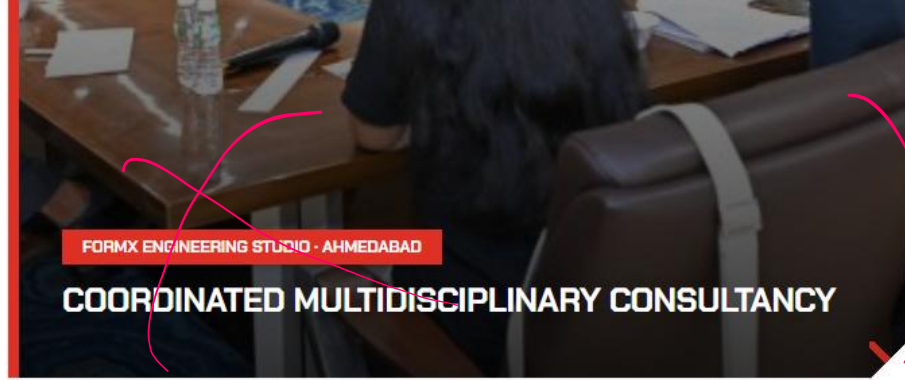

Our Mission

To provide sustainable and effective industrial design and engineering solutions that help clients create top-performing, adaptable, and future-ready facilities.

Our Value

We uphold professionalism, transparency, technical expertise, and mutual respect in every engagement, ensuring strong collaboration, ethical practices, and consistent delivery across all projects.

Fire Protection Engineering, and Project Management & Procurement — as coordinated, construction-ready documentation with technical support through execution.

✓ FUNCTIONALITY & BUILDABILITY

✓ REGULATORY COMPLIANCE

✓ SEAMLESS MULTIDISCIPLINARY COORDINATION

✓ CONCEPT TO COMPLETION DELIVERY

DELIVERY

- ◆ Project Management

INTEGRATED SCOPE →

Coordinated under one window — Architecture, Structure, Civil, and MEP.

METHODOLOGY

PILLARS OF FORMX EXECUTION

01

SCOPE THAT MATCHES DELIVERY

From architectural planning and industrial building design to structural systems, civil works, MEP utilities, fire protection, and procurement — each service is defined by clear scope highlights and typical deliverables.

02

COORDINATED ACROSS DISCIPLINES

Architecture, structure, civil, mechanical, electrical, and fire protection are integrated so layouts, junctions, and utility networks stay clash-free before they reach site.

03

SUPPORT THROUGH EXECUTION

We provide continuous design support during construction through revisions, technical clarifications, tender documentation, and construction-stage engineering.

DELIVERY METHODOLOGY

CONCEPT TO CONSTRUCTION

A disciplined workflow for constructability and clash-free GFC packages.

01

CONCEPT & ZONING

Operational flow analysis, master planning, statutory setback compliance, and preliminary structural grid definition.

02

SCHEMATIC ENGINEERING

Multi-discipline 3D BIM coordination aligning RCC/steel frames with HVAC, piping, and electrical risers.

03

TENDER & GFC PACKAGE

Construction-ready GFC drawings, calculation reports, BOQ, and tender technical specs.

04

SITE EXECUTION SUPPORT

Technical clarifications, shop drawing reviews, revisions, and on-site engineering verification.

LEADERSHIP

PARTNERS CLOSE TO THE WORK

Led by Founder & Managing Director Hiren J. Shah alongside senior practice leads overseeing

~~architecture, structural systems, MEP engineering, and site execution.~~

Structural designer, architecture planning & site execution.

FOUNDER

CO-FOUNDER & MANAGING PARTNER

Hiren J. Shah

Co-Founder & Managing Partner of FormX Consultants LLP. Leading multidisciplinary engineering design focused on industrial, commercial, and building projects. Specialising in RCC & steel structural design, PEB support, and value engineering.

- ◆ RCC & Steel Structural Design
- ◆ PEB Design Support & Consultancy
- ◆ Concept-to-Execution Stage Oversight
- ◆ Industrial & Greenfield Plants
- ◆ Value Engineering & Optimization

CONNECT ON LINKEDIN

Ahmedabad, Gujarat · India

01

Architecture Practice Lead

ARCHITECTURE & PLANNING

Leads architectural planning and construction-ready documentation — layouts, GA drawings, and GFC packages coordinated with structure and MEP for industrial, commercial, and institutional buildings.

02

Structural & Civil Lead

STRUCTURAL & CIVIL ENGINEERING

Owens structural and civil delivery — RCC and steel systems, foundations, grading, roads, and drainage engineered for safety, constructability, and long-term performance.

03

MEP & Fire Lead

MECHANICAL, ELECTRICAL, HVAC & FIRE

Drives mechanical utilities, HVAC & refrigeration, electrical, and fire protection so systems are efficient, code-compliant, and clash-free before they reach site.

04

Delivery & Procurement Lead

PROJECT MANAGEMENT & PROCUREMENT

Coordinates programme, tender documentation, vendor evaluation, and construction-stage support — keeping multidisciplinary delivery on scope, schedule, and quality.

WHY FORMX

WHY CLIENTS CHOOSE FORMX

01

Precise architectural planning

Layouts developed for operational needs, space efficiency, and statutory compliance — ready for structural and MEP integration.

02

Safe, buildable structures

RCC and steel systems, foundation, roads, and drainage engineering for constructability, and long-term

04

Site infrastructure that works

Roads, stormwater, water supply, and external development planned for connectivity, safety, and future expansion.

05

Sustainable by design

Climate-responsive, energy- and water-efficient strategies embedded without compromising function or project budget.

Why Choose

Why Choose VMS?

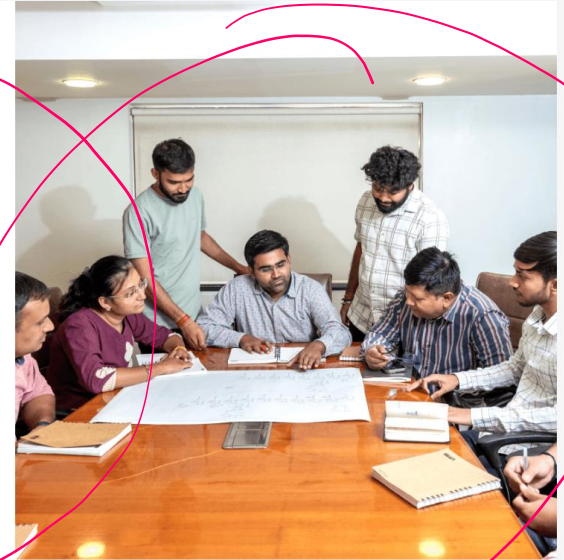

We bring together experience, multidisciplinary expertise, and a practical approach to deliver well-coordinated industrial design and engineering solutions.

1. Integrated Design Approach

Our in-house teams across architecture, structure, and MEPF work in coordination, ensuring an integrated design development.

2. Experience Across Industries

3. Practical & Scalable Solutions
